SUMMARY

Product Manager with 4+ years in B2B SaaS and finance, now building AI-native products that ship fast and break less. Delivered 30-45% efficiency gains across data ingestion, QA automation, and release quality. Known for translating ambiguous problems into clear roadmaps and cross-functional alignment with a QA background that makes every launch more confident.

WORK EXPERIENCE

Product Manager (L02) **March 2024 – Present**
Acuity Analytics *Bengaluru, Karnataka, India*

- Partnered with product, design, and engineering to define feature scopes, drive sprint planning, and communicate feature value to stakeholders, delivering enhancements that improved enterprise reporting accuracy
- Owned end to end product lifecycle for FolioSure, driving AI powered data ingestion workflows that cut ingestion time by 32%, reduced collection friction by 25%, and eliminated manual validation overhead from redundant data.
- Delivered an AI powered KPI mapping module managing 100+ user stories across product, design, and engineering improving reporting speed for PE clients by 35% and reducing post release defects by 43% via CI/CD gates.
- Built an AI agentic workflow auto-generating test plans from user stories, cutting manual QA workload by 45% and doubling automation coverage accelerating release confidence across all launches.

Product Quality Manager (L01) **February 2022 – March 2024**
Acuity Knowledge Partner *Bengaluru, Karnataka, India*

- Designed and executed a comprehensive product quality strategy, using root-cause analysis and analytics to enable data-driven product release and milestone decisions.
- Optimized product delivery cycles by building CI/CD-enabled automation, streamlining stakeholder communication, and increasing release frequency by 30-40% with minimal defects.

Front-end Developer **September 2021 – February 2022**
Mn Labs *Indore, Madhya Pradesh, India*

Collaborated across product and engineering teams to deliver and test accessible UI components, ensuring design fidelity and enhancing user experience for web clients.
